

Lyrics

No Better Fly Than a Butterfly

Come sing with us!

No better fly than a butterfly
No better fly than a butterfly
Across the land, across the sky
There's no better fly than a butterfly

One day I met a little caterpillar
Munching on a leaf, a healthy belly filler
We talked for a while, made each other smile
Eating leaves like they were going out of style!

No better fly than a butterfly
No better fly than a butterfly
Across the land, across the sky
There's no better fly than a butterfly

I went back to see my caterpillar friend
There was a cocoon on the leaf where she had been
I looked all around, up and then down
Everywhere I looked she was nowhere to be found

No better fly than a butterfly
No better fly than a butterfly
Across the land, across the sky
There's no better fly than a butterfly

One day I saw the cocoon made a move
And out popped a creature, beautiful and new
I recognized her smile, now I know why
That little caterpillar became a butterfly!

No better fly than a butterfly
No better fly than a butterfly
Across the land, across the sky
There's no better fly than a butterfly
