

Lyrics

You Can Be Anything

Come sing with us!

You can be anything
Be anything
I like to dream when I'm wide awake
I try to dance every step I take
I'm living in the good old days
Right now (right now)

Take control of my destiny
I want to show the best in me
I'm writing my own history
Out loud (out loud)

You can be anything you want
Let your light shine in the dark
You can be anything you want
Every fire begins with a spark

I believe I can touch the sky
Give me wings and I'll learn to fly (high!)
If I fall, take another try
Keep trying (keep trying)

Sometimes I win, sometimes I lose
I love the game no matter what I do
Follow my heart and follow through
Keep flying (keep flying)

You can be anything you want
Let your light shine in the dark
You can be anything you want
Every fire begins with a spark
You can be anything
Be anything

Every fire begins with a spark
You can be anything you want
Let your light shine in the dark
You can be anything you want
Every fire begins with a spark
(You can be anything)

You can be anything you want
Let your light shine in the dark
You can be anything you want (anything)
Every fire begins with a spark

You can be anything (anything)
Be anything
Every fire begins with a spark
You can be anything (anything)
Be anything
Every fire begins with a spark
